PROFESSIONAL SUMMARY

AI/ML Engineer and Python Developer with hands-on experience across Explainable AI (SHAP, LIME), computer vision (YOLOv8, OpenCV), and Generative AI (LLMs, prompt engineering). Skilled in full-stack development (FastAPI, React, TypeScript) and shipping end-to-end AI applications from model to production-style deployment.

EXPERIENCE

Python Developer Intern

July/2022-Aug/2022

iBase Electrosoft LLP

- Built and deployed Python-based applications covering core concepts like OOP, file handling, and API integration, improving overall code efficiency.
- Developed a multilingual voice generation desktop application using Python and CustomTkinter with text-to-speech, speech-to-text and real-time translation support. | [Github](#) (Python | CustomTkinter | gTTS | SpeechRecognition)

PROJECT

XAI Sports Analytics Platform: [Github](#) | [Live Demo](#) | [Research Paper](#) (SHAP | LIME | FastAPI | Streamlit | XGBoost)

- Developed an Explainable AI-based sports analytics platform to predict player performance and analyze injury risk using machine learning models.
- Integrated SHAP and LIME to generate interpretable predictions, improving model transparency and trustworthiness.
- Built interactive dashboards and visualizations to help coaches and analysts understand key performance factors and make data-driven decisions.

ReelCraft AI: [Github](#)

(React | TypeScript | LLMs | FastAPI | Prompt Engineering | Generative AI)

- Developed a Generative AI-powered cinematic reel generation platform that transforms text prompts into enhanced cinematic scenes, AI-generated visuals, and downloadable animated reels.
- Integrated Groq API for prompt enhancement and Stability AI for AI image generation with a resilient fallback pipeline.
- Built a responsive interface for storyboard visualization, scene generation, and downloadable AI-generated reels.

VisionAid – AI Assistive Navigation System: [Github](#) | [Live Demo](#) (React | OpenCV | Next.js | YOLOv8 | FastAPI)

- Built a real-time YOLOv8-based navigation system for visually impaired users, detecting obstacles from live camera input.
- Implemented obstacle detection, distance estimation, and voice-guided alerts for safer environmental navigation.
- Built a full-stack application using FastAPI and Next.js to process live camera feeds and deliver low-latency assistance.

EDUCATION

Bachelor of Engineering (Computer Science & Engineering)

June 2026

Prof. Ram Meghe College of Engineering and Management, Badnera, Amravati
Sant Gadge Baba Amravati University (SGBAU)

CGPA: 8.32/10

Diploma in Computer Engineering

May 2023

Government Polytechnic, Yavatmal
Maharashtra State Board of Technical Education (MSBTE)

Percentage: 80.23

TECHNICAL SKILLS

Languages: Java, Python, JavaScript, SQL

Web Technologies: HTML, CSS, React, FastAPI, TypeScript

Cloud, Databases & Tools: MySQL, Google Cloud, Firebase, Docker, Git, Streamlit

AI / Machine Learning: Machine Learning, Explainable AI (SHAP, LIME), Computer Vision, Groq API, Generative AI, LLMs, Prompt Engineering, RAG, XGBoost, Scikit-learn, Pandas, NumPy

CourseWork: Data Structures & Algorithms, Object-Oriented Programming, Database Management Systems, Data Science

CERTIFICATES

- Artificial Intelligence Fundamentals – IBM
- Elements of AI – University of Helsinki
- Python Development Internship Certification – iBase Electrosoft LLP
- GenAI Powered Data Analytics Job Simulation - TATA

PUBLICATIONS

- XAI-Powered Sports Analytics Suite for Player Performance, Injury Risk, and Match Outcome – IJCRT, 2026 | Co-author
